

FUEL STORAGE AND DISPENSING SYSTEM

INTERMODALLY TRANSPORTABLE, THE FSD RANGE DELIVERS UP TO 46,000L OF DIVERSE FUELS, PROVIDING AN INSTANT FUEL STATION CAPABILITY IN AUSTERE ENVIRONMENTS.

Fitted within a standard or super-cube ISO frame, the system provides a self-contained 'Drop&Go' solution for deployable refuelling.

Transportable by road and maritime networks, the system's double-shelled tank is EPA-approved and comes equipped with a leakage monitoring system.

HIGHLY CUSTOMIZABLE TO MEET YOUR REQUIREMENTS

INTERMODAL

BASE SPECIFICATION

Model	FSD-40
Suitable for	Diesel/Petrol
Capacity	40,000+L
Approvals	EN 13094, CSC
Transport capability	Road, sea (empty, clean)
Frame type	ISO Supercube
Dimensions	40'x8'x9'6"
Base tank material	304 Stainless
Handling	20' Intermediate ISO casting
Tare weight*	Ca. 8,900kg
MGW @ 95% fill*	45,000Kg
Optional equipment	<ul style="list-style-type: none"> Bulk loading pump and twin dispensers High capacity loading/discharge pump Twin dispensers to fuel two vehicles simultaneously 10kW heavy-duty generator set or external power Air conditioned accommodation area for personnel Integral genset Night light package Aircraft refueling Super-cube variants with capacities up to 46,000L

*Nominal Data Only - Alternative capacities and weight-reduced variants available subject to design availability.
