- Liquid cooled linear amplifier
- 1.6 – 30 MHz continuous coverage
- 1kW continuous duty cycle (100%)
- USB, LSB (SSB), CW, FSK, AM
- Remote control via IP and WiFi
- Compatible with existing 4 & 6 digital selective calling radio networks
- 2G & 3G Automatic Link Establishment (ALE) options
- ARINC ICAO Annex 10 Aeronautical Selcall option
- Field re-programmable via USB

The Barrett 1KW HF Transmitter is a compact rack mounted communications solution developed for base station applications in large HF networks. The transmitter comes as a complete package with an exciter, power supply, power amplifier, interconnecting cables and all required rack mount hardware.

The 4075 linear amplifier is designed and engineered for modern communications which are heavily data orientated, requiring the equipment to work at high duty cycles for extended periods of time. The unique liquid cooled design increases efficiency resulting in less system deterioration due to overheating in the power stages, extending overall equipment service life. The compact rack mounted amplifier, together with its power supply occupies just 5U of cabinet space.

The Barrett 4075 amplifier natively supports the Barrett 4050 Transceiver/Exciter which when coupled requires no further tuning or adjustment. A flexible I/O interface and analogue ALC feedback provide the transceiver/exciter full control over final output power. Intelligent electronic controls protect the 4075 from input and output overload while providing a sophisticated early warning and a diagnostic interface for system monitoring and event logging. Customisable auxiliary ports are also available for enhanced system control.

The 4075 system is field re-programmable via USB and Ethernet allowing the end user to update system software. An on-board micro SD card provides enhanced flexibility for system language, display customisation and event logging.

The Barrett ISO9001 Quality Assurance Program ensures consistent performance and the highest reliability.
4075 HIGH POWER 1 kW HF TRANSMITTER

General Specifications
Frequency coverage 1.6MHz to 30MHz
Channel capacity 1000 with 4050 HF Transceiver
Modes USB/LSB (SSB), CW, FSK, AM
Power output 1000W PEP
Duty cycle 100%, Continuous PEP, CW
Exciter 4050 HF SDR transceiver

4075 Linear Amplifier Specifications
Power Output CW 1 kW ± 1.5 dB
Power input 10 W min – 100W max, step attenuated
Power Gain +25 dB
Harmonics & Spurious Less than -55 dB
ALC Voltage (output) 0 – 10V
Filter Type 7 Band LPF
Dimensions 178 H x 482 W x 480 D mm
excluding handles and I/O connectors
Power Requirements 48V dc @ 60A, 12V-24V dc @ 2.5 A max
Rack Height 4U, 19” Rack mount
Weight 35 kg (77 lbs)
Cooling Liquid cooled, Water Propylene Glycol mixture
Temperature -10°C to +50°C operational, 40°C to +85°C storage
Humidity 95% relative, non condensing
Altitude 3000 m above sea level (not airborne), 9000m transportation
Input overdrive protection +6 dBm max
Output VSWR protection 3:1 nominal all magnitude and phases
Thermal Overload protection 85°C
Fault Log System events and error reporting
Standards Designed to meet or exceed:
- Mil-STD 810G shock and vibration*
- FCC/IC/ETS*
- CE*
- Australia/New Zealand AS/NZS 4770 2000 and AS/NZS 4582:1999

Specifications are typical. Equipment descriptions and specifications are subject to change without notice or obligation.
* Approval pending

Typical 4075 High power 1 kW HF transmitter example
1 Barrett 4075 Power distribution unit
2 Barrett 4050 SDR HF transceiver exciter
3 Barrett 4022 12V Power supply
4 Barrett 4075 48V Power supply
5 Barrett 4075 Linear amplifier

The Barrett 4075 High power 1 kW HF transmitter is installed into either a 20U P/N BC407510 or 39U P/N BC407510 rack unit with a depth of 700 mm. It ships as a complete unit including 19’ rack mounting kits and blanking plates and all necessary cables and hardware ready for operation.
