enhance day and night flight operations with high quality lighting solutions

Pioneers of optical and LED technology, Oxley has a wealth of knowledge and expertise in the field of aircraft lighting systems. We are world renowned for our aircraft upgrades and components that are designed for day and night operations where night vision goggles (NVG) or night vision imaging systems (NVIS) will be used.

Oxley is a turnkey provider of aircraft lighting. Innovation, integration and installation are three concepts that underpin our dedication and approach.

We have an ongoing commitment to finding new and innovative ways of applying our expertise to solve customer problems.

We consider the whole aircraft and any associated equipment or platforms to ensure that our equipment is fully incorporated and compliant with the operational needs of the end-user.

Our dedicated installation team carry out on-site installations with professionalism, speed and efficiency. Equipment modifications can be done in advance at our factory or onsite.

For technology enhancements or to convert aircraft for use with NVGs, Oxley has a range of cost effective replacements or modifications for existing lighting. Customised and off the shelf designs of LED and optical filter solutions are available for all external positions.

• Navigation
• Tail position
• Formation
• Anti-collision
• Landing
• Taxi
• Emergency egress
• Fuel probe
• Strobe
• Electronic control units

Oxley is a turnkey provider of aircraft lighting. Innovation, integration and installation are three concepts that underpin our dedication and approach.

World leaders in night vision lighting, we have a total capability in design and manufacture. This is supported by in-house optical coating, precision machining, assembly and test facilities enabling rapid turnaround of prototype developments, modifications and UOR requirements.

We provide standard and customised solutions in standard LED visible and night vision technologies for cabin, cargo bay, loading ramp, walkways and general illumination.

• Emergency egress
• Dome
• Area
• Mini floodlight

We have a wide range of MIL-STD-3009 NVG compatible components available and offer a full night vision cockpit upgrade service.

• Equipment modifications
• Optical filters
• Bridges
• Bezels
• Panel lamps
• Type III caps
• T1 LED bulb replacements
• Edge lit panels
• Indicators

Established since 1942, we are world renowned for our innovative contribution to lighting. We were involved in the UK’s first NVG compatible cockpit conversion for the UK Ministry of Defence; coined the term NVG Friendly and have registered many patents for lighting technology developments. From fleet-wide upgrades to cockpit components, Oxley is a reputable and preferred supplier.

NVG compatible • Oxley NVG Friendly™ • covert infra-red • visible • dual mode • NVIS compatible • MIL-STD-3009
