

## GPMG (L7A2/M240/MAG58) Triple Picatinny Handguard

ISTEC: 6084

### Description

ISTEC's 'GPMG Triple Picatinny Handguard' is a lightweight, high strength product that shrouds and clamps to the gas tube of the GPMG (L7A2/M240/MAG58) weapon.

Reduced contact between the gas tube and handguard minimises heat transfer from the weapon to the Picatinny rails. The handguard body and Picatinny rails are manufactured from hard anodised matt black Aluminium alloy.

The handguard is secured in position by 2 matt black stainless steel 'bridge clamps'. The 3 Picatinny rails can be replaced. The Handguard is fitted to the weapon using a single hexagon key. The handguard weighs just 340g.

### Key Features

- 3 Full length Picatinny Rails
- Lightweight - 340g
- Hard wearing aluminium alloy construction (6082-T6)
- Bipod Stowage
- Easily fitted/removed by operator
- Does not interfere with weapon mounting points.
- Replaceable rails
- Reduced heat transfer between gas tube and hand guard.
