

## MG3 Soft Mount

ISTEC: 6880

### Description

The MG3 Gun Mount Assembly has been specifically designed against stringent requirements for use on board fast assault craft and light vehicles. The modular design gives the system flexibility, enabling deployment on a wide range of both land and sea platforms.

The MG3 Gun Mount Assembly is the product of a requirement to provide a lightweight, compact and robust MG3 gun mount for use in the most testing of marine environments. The basic gun mount assembly has been adapted to allow it to be fitted onto land or marine craft via a G3 cone. The gun mount is fully self contained with ammo tray and catch bag; as well as elevation and depression stops; and arc stops tailored to the customers requirement when fitted to the Universal Gun Mount (UGM). The system is fully capable of having a shield mounted for added gunner protection.

Being designed for use in marine environments, the gun mount is manufactured from marine grade stainless steel and is coated to Mil Stds. The materials and lessons learnt in designing for arduous marine environments have been transferred to the mount when operating in the land environment, thereby providing a more robust and resilient mount.

### Key Features

- Weight – Under 8kg (soft mount, catch bag, ammo tray)
- Length – 540mm (allows support to front and rear weapon mounting points)
- Height – 200mm
- Width – 200mm (without ammo tray and catch bag)
- Mounting Method – G3 Cone and extendable rear securing bracket when used on the UGM.
- Protection – Option shield in either Dyneema or Steel
- Ammunition – 400 rds fitted to weapon mount.
- Catch Bag – Sufficient for 200+ empty cases and link
- Materials – Made from Stainless Steel, coated to Mil Stds
- Operational Environments – Designed for operations on both land and sea across the full spectrum of climatic conditions.
