

M249/L110A2 Triple Picatinny Handguard

ISTEC: 6085

Description

ISTECs' 'M249/L110A2 Minimi 5.56 mm Triple Picatinny Handguard' is a lightweight, high strength product that shrouds and clamps to the receiver barrel extension.

The handguard has three full length Picatinny rails. The Picatinny side rails are inline with the barrel bore axis to improve accuracy of lasers aimers and designators. A recess is machined on the Handguard to enable the bipod to be stored in the folded position.

The handguard body and Picatinny rails are manufactured from hard anodised matt black Aluminium alloy. The handguard is secured in position by 2 matt black high strength stainless steel 'spigot clamps'. The 3 Picatinny rails are replaceable. The Handguard is fitted to the weapon using a single hexagon key. The handgrip weighs just 310g.

Key Features

- 3 Full length Picatinny Rails
- Lightweight - 310g
- Hard wearing aluminium alloy construction (6082-T6)
- Bipod Stowage
- Hand grip
- Side rails in line with barrel axis
- Easily fitted/removed by operator
- Does not interfere with weapon mounting points.
