

Personal Solar Charger

The perfect portable foldable robust
solar charger for everyday charging.

Solar power at
your fingertips

Charges your mobile phone,
iPod and other devices.

Personal Solar Charger

The perfect portable foldable robust solar charger for everyday charging.

A mini lightweight solar charger that directly charges most everyday portable electronic devices...and it charges AA batteries.

It will charge 2 AA batteries, from fully spent, to full charge in 4 hours with full sun. In addition to battery charging, utilizing the universal USB port and working with 2 rechargeable batteries (included) it allows direct charging of most micro USB devices.

Key features:

- "Turns on" sooner and "turns off" later
- Resists point damage
- Powers even in 100% darkness through the USB port because the 2 rechargeable batteries act as storage devices for the energy absorbed by the solar panels during the day.

Name:

Powerfilm Solar USB+AA-ACU 4 Panel AA Charger
Foldable Solar Charger with USB port digital camo fabric

System types:

Portable

Item Type:

Chargers

SKU:

pfs-001-002

Specification:

Wattage: 1.5W
