ESD FLOORING SOLUTIONS

STATIC DISSIPATIVE VINYL FLOORING

Permanent static-dissipative tiles are laid onto a highly conductive adhesive. (Material can be supply only or can be fully fitted and certificated by our highly trained experienced personnel). There is a carbon element fused into the tile giving permanent electrical properties which are independent of humidity. The tiles are pressed not calendered to give an extremely hard wearing and stable material. The tiles are micro-squared to eliminate the need for seam welding which reduces the cost of the installation.

ERGO MATS

Static dissipating ERGO mats can help prevent tiredness of the feet and back and can also help reduce cramp and circulatory problems. Mats are non-slip and extremely durable. (Resistivity $10^6 - 10^9$ ohms / square.)

Ref	Sizes
ERG906	0.9 x 0.6 metres.
ERG912	0.9 x 1.2 metres.
ERG918	0.9 x 1.8 metres.

ANTI-FATIGUE MATTING

Tough, long lasting static dissipating anti-fatigue matting providing comfort underfoot. Grey matting is 9mm thick. Surface resistivity is $10^6 - 10^9$ ohms / square and should be used in conjunction with already grounded flooring.

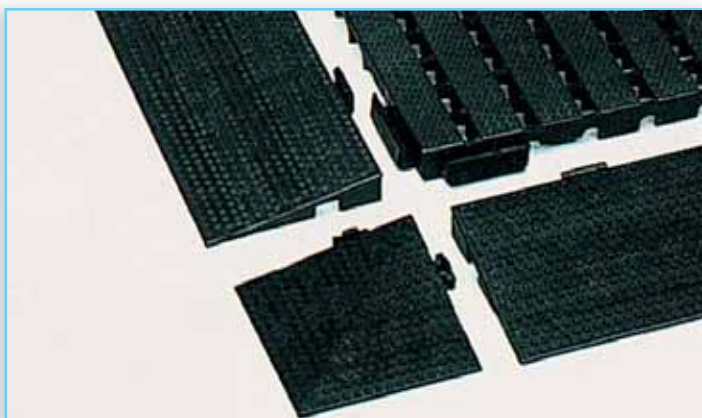

Ref	Sizes
AFS	0.9 x 0.6 metres.
AFM	0.9 x 1.5 metres.
AFL	0.9 x 10.3 metres.

CONTAINER STORAGE SHELVING SYSTEM

Height 1010mm and 2010mm.

This shelving system was especially developed to
take stacking containers.

The advantage of this system is that containers
of different heights can be placed within the
same run. The shelving system is based on the
drawer storage concept with rear stops
preventing containers being pushed too far
through the upright frames. The modular
construction of this shelving system ensures the
most efficient use of available storage space.
