

Our in-house Engineering Design Team has years of experience in antenna design. We can supplement your own engineering efforts and be a valued RF sounding board. We can help you envision all sorts of ways the antennas can be used, including break-apart omnis and embedded, body-worn patches.

Mobile Mark military antennas comply with Mil specs such as MIL-810G. Our antennas are designed and tested in our in-house facilities located in the US, just outside Chicago.

| BODY WORN & EMBEDDED ANTENNAS | ASSET TRACKING ANTENNAS | NETWORK ANTENNAS | VEHICLE ANTENNAS | SPECIALIZED FREQUENCY ANTENNAS |
|--|---|---|--|--|
|  <p>PM-1350 Series Patch Wearable patch antenna 1350-1390 MHz 4 dBi</p> |  <p>SM Series, Surface Mount Lowest Profile, Rugged GPS & Cellular Unity Gain</p> |  <p>SCR Series Corner Reflector Broadband Beamwidth WiFi, WiMAX, DSRC, Public Safety 4.9 9-13 dBi Gain</p> |  <p>SMD WiFi MIMO Surface Mount Multiple-Input-Multiple-Output WiFi, 2.4 & 5GHz 4 dBi</p> |  <p>RMM-1400 Series Body Mount Rugged, military colors 1330-1600 MHz 5 dBi Peak</p> |
|  <p>EM Series Embedded Custom Enclosures or board-only Cellular, 824-2200 MHz 0-2 dBi</p> |  <p>HD7 Series Panel Heavy Duty RFID 902-928 MHz 7 dBi</p> |  <p>ODN12-2400BA Series Omni-Directional Breakaway 2400-2485 MHz 12 dBi</p> |  <p>SMW-305 Series Surface Mount 3-Cable, multiple combinations Cellular, WiFi & GPS 2-5 dBi</p> |  <p>ECO Series Omni-directional Recessed N Plug, N Female, Pigtail WiFi, WiMAX, DSRC Public Safety 4.9 5-12 dBi Gain</p> |
|  <p>CVL Series Overmold Multiband LTE Covert 694-960 & 1700-2700 MHz 2 dBi</p> |  <p>RM Series w/ Ground Plane Rod 4.4 - 5.0 GHz 3 dBi</p> |  <p>PS Series Directional Sector Low Profile, 12.5" tall WiFi, WiMAX, DSRC, Public Safety 4.9 10-14 dBi</p> |  <p>LTM Series, 5-cable Multi-band Fleet Management LTE MIMO, WiFi MIMO, GPS 4-5 dBi gain</p> |  <p>PSTN2-2200 Series Rubber Duck, Halfwave 2100-2300 MHz 3 dBi</p> |

Innovative antenna designs...
Made-in-the-USA reliability

At Mobile Mark, we understand that military requirements are different, that the antennas will be used in difficult environments and need to be ready for squad deployments, pop-up stations, or communications intelligence-gathering (COMINT). That's why our antennas are rugged, durable and reliable.

We handle the usual and the unusual, from standard products to specialty products. Think of it as "COTS with flexibility". We offer all the convenience and cost savings of off-the-shelf products but with the ability to tweak the design to better meet your in-the-field requirements.

We have antennas for many commercially available wireless networks as well as antennas for dedicated military frequencies, such as 1350 MHz or 4.4 GHz. Our antennas are designed and manufactured in the United States.

Body-worn & Embedded Antennas

For specialized applications where it is important to track the individual soldier, embedding the antenna directly in the troop's equipment or clothing has many advantages... and tradeoffs. We can help you understand what you gain and what you lose with different antenna styles. Our expertise includes board-only styles as well as slim profile over-molded styles.

Network Antennas

Mobile Mark offers omni-directional site antennas in military appropriate colors such as olive drab and desert sand. Specialized antennas to speed network deployment include the 12 dBi Break-Apart Antenna that can collapse down into two easy-to-carry pieces. We also offer low profile, compact directional antennas for dependable point-to-point connections.

Specialized Frequencies Antennas

Sometimes a COTS antenna just needs to be tweaked to cover a different frequency or to provide a different radiation pattern. And, sometimes, the need is so unique that nothing but a customer design will do the job. Mobile Mark's team of design engineers can handle it all, whether the design requirement is electrical or mechanical.

Asset Tracking Antennas

Reliable asset management requires making use of multiple systems: RFID tag readers, Wi-Fi based Bar Code scanning, GPS location systems as well as Cellular M2M (machine-to-machine) transmissions. Mobile Mark can help you put together the right mix of antennas from site to mobile to covert.

Vehicle Antennas

Mobile antenna selection becomes complicated as new wireless protocols, such as LTE and 802.11ac, are added to the network. Mobile Mark is the industry leader in multiband antennas; we can combine multiple antenna solutions in a single compact, durable package. Our mobile antennas meet Military specs for Shock, Vibration, Temperature and Water Ingress.
