

NARCOTICS TEST KITS (NTK)

SPECIFICATION SHEET
NARCOTICS TEST KIT (NTK)
DEVICE PART No: BBINTK-AM / BBINTK-COC / BBINTK-HER

Narcotics Test Kit (NTK)

The Narcotics Test Kit (NTK) is a single-use, simple to use spot test. The NTK is provided as a paper strip with dry reagent test zones applied to the strip surface. The NTK addresses the increasing numbers of suspicious Drugs of Abuse shipments encountered at entry points, clandestine laboratory manufacture, illegal use, and negative social impact with a rapid, simple, and reliable technology designed for identification of Drugs of Abuse by first responders and frontline personnel.

Three NTK tests are available, capable of detecting:

- Amphetamines
- Heroin
- Cocaine

■ KEY FEATURES

- + The NTK tests provide results in less than 20 seconds.
- + Portability - Each NTK weighs only 0.02 grams and fits in a shirt pocket or wallet.
- + Kits contain no hazardous or corrosive liquids and no glass vials.
- + No power requirements.
- + A minimum shelf life of 18 months.

CANNABIS TEST KIT (CTK)

SPECIFICATION SHEET
CANNABIS TEST KIT (CTK)
DEVICE PART No: BBICK

Cannabis Test Kit (CTK)

The Cannabis Test Kit (CTK) is similar to the NTK in that it is a single-use, simple to use spot test. The CTK is provided as a paper strip with dry reagent test zones applied to the strip surface. A cotton swab is also provided for suspect residue transfer to the paper strip test zone for analysis. Positive indication is rapid, if not instant, taking less than 2 seconds. If no positive colour indication has been observed after 10 seconds, the suspect residue is unlikely to contain detectable cannabis material.

The CTK is capable of detecting:

- All active cannabis plant residue (e.g., leaves, stems, fruiting bodies)
- Cannabis extracts (oils, resins, and plant extract)
- Cannabis extracts within consumables, including confectionary and food products (edibles)
- Compounds including, but not limited to, cannabidiol, cannabichromene, THC, and cannabinoid

■ KEY FEATURES

- + The CTK test provide results in less than 10 seconds.
- + Portability - Each CTK weighs only 0.02 grams and fits in a shirt pocket or wallet.
- + Kits contain no hazardous or corrosive liquids and no glass vials.
- + No power requirements.
- + A minimum shelf life of 18 months.
