SOURCE™ RESERVOIR

From the start of your
journey to your final
destination, you will
feel the benefits of the
PAYLOAD

PAYLOAD SPEC

Available in:

Black

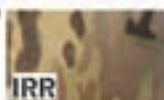

CR801B

Coyote

CR801C

Multicam™

IRR

CR801M

Storm Valve™

Easier to drink from.
Faster flow rate than most bite valves

Dirt Shield™

Cool weave
insulating cover
tube

Angled Valve

Easier to drink than
from a straight Valve.

Baffled Reservoir

(For Payload and Haul systems only)
Helps to reduce the sloshing around
of the water when you are on the move.
Also stops the large bulge at the bottom
of reservoir when more than half full.

Chilly™ system attachment

FABRICS

Robust Polyamide fabric
available in:
Multicam™/Coyote/Black

TOP FRONT POCKET

10 Litre pocket features
an internal mesh pocket
and external smaller
for documents.

4 COMPRESSION STRAPS

MAIN COMPARTMENT

The 30L main capacity features
a long zip, extending low down
each side of the pack for easy
access.

LOWER FRONT POCKET

5 Litre pocket.
Zip opening extends the width
of the pack for ease of access.

CAPACITY

Capacity:
45 Litres
Cargo capacity:
45 Litres
Source reservoir:
3 Litres
Weight @ 2kg

LOAD CARRIAGE

The pack is
shaped to
encourage the
weight of the
load high and
close to the back.

PLCE CLIPS

NATO spec clips for
attaching
load carriage side
pouches or the
Jetstream.

SIDE WATER BOTTLE POCKET

ADDITIONAL FEATURES:

- Molle attachments
- Hook and loop points for ID
- 2 Internal load securing straps for
heavy objects like radios
- Lightweight

RESERVOIR PACK

External access to the reservoir pocket,
positioned close the back for a good centre
of gravity. The pocket is padded with
closed cell foam to protect the reservoir
and add more insulation to keep the
contents cool or warm.

FRAME

Internal strong stiff plastic
panel with lightweight aluminium
spine helps transfer the load from
your shoulders to the hips.

SPACER FABRIC

Comfy air mesh
material is used on
the spacer pads and
shoulder straps to
minimise the build
up of perspiration at
these contact points
and increase comfort.

TUBE EXIT PORTS

Open points for
over the shoulder or
under the arm access
to your drinking tube.

LUMBAR AND SHOULDER SPACER PADS

Thick closed cell foam padding
increases the stand off of the pack
from your back, so allowing maximum
airflow in between the pads.

COMFORTABLE HIP BELT

Comfortable and removable
the hip belt help transfer the
weight to the hips. Has the same
great padding and material as
the spacer pad.
