Transfer of Technology

Survival Systems Limited's staff has accumulated more than 250 years' experience in aviation; maritime transport; survival techniques; simulator, personnel-rated lift system, and facility design; construction; installations; and long-term customer support.

Technical Expertise

- Work with your facility architects, engineers, and contractors to offer subject matter expertise related to construction and equipment delivery, installation, and integration
- Supplement and bridge your facility engineering and infrastructure challenges related to mechanical, electrical, layout, and student throughput, etc.
- Support decisions related to existing facility modifications including retrofit of older, non personnel-rated lifting systems, new designs, product testing, certification, and integration to your facility
- Custom design and fabricate your ideal METS®, personnel-rated lift system, and recommend suitable training aids

Training Expertise

- Provide Instructor Development training including written Program of Instruction customized to your client base
- Deliver Maintenance Technician and Operator training
- Offer refresher training and / or audit for core competencies
- Assist with OPITO accreditation audit readiness
