Water Purification System

Trailer/Skid Mounted

7200 Litres of drinking water per hour from Fresh Water Source

# 7200 Litres per hour from Freshwater

- 3 Stage Filtration
  - UVC Disinfection
  - Pressurised system to enable tap stations
  - Skid mounted in trailer for static or mobile applications
- 
- Purify water AT SOURCE and need

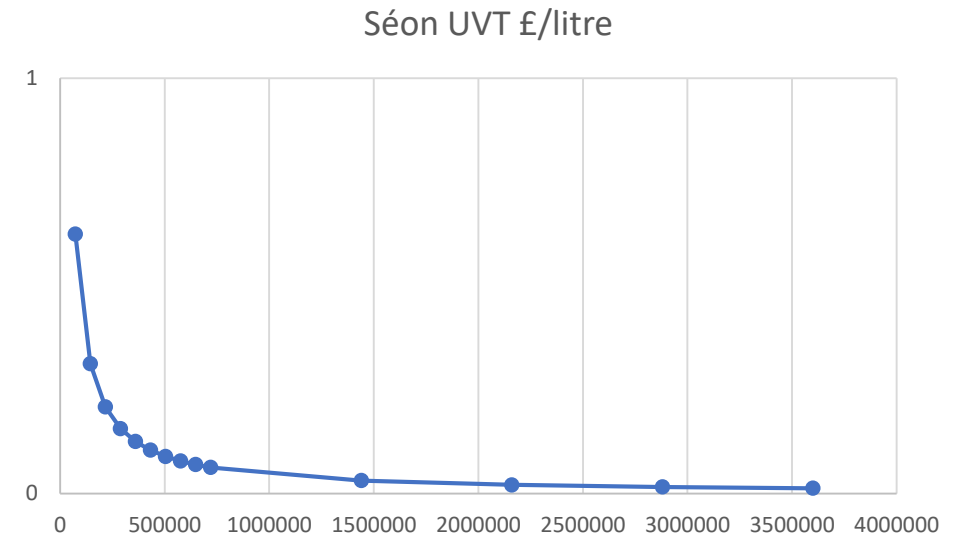

# Easy to Use

- Simple operation – Low Operator skill level
- Skid mounted in All Terrain Trailer
- Direct feed from Freshwater source
  - River, Lake, Stream, Borehole
- Minimal maintenance
- No special tools or expertise required

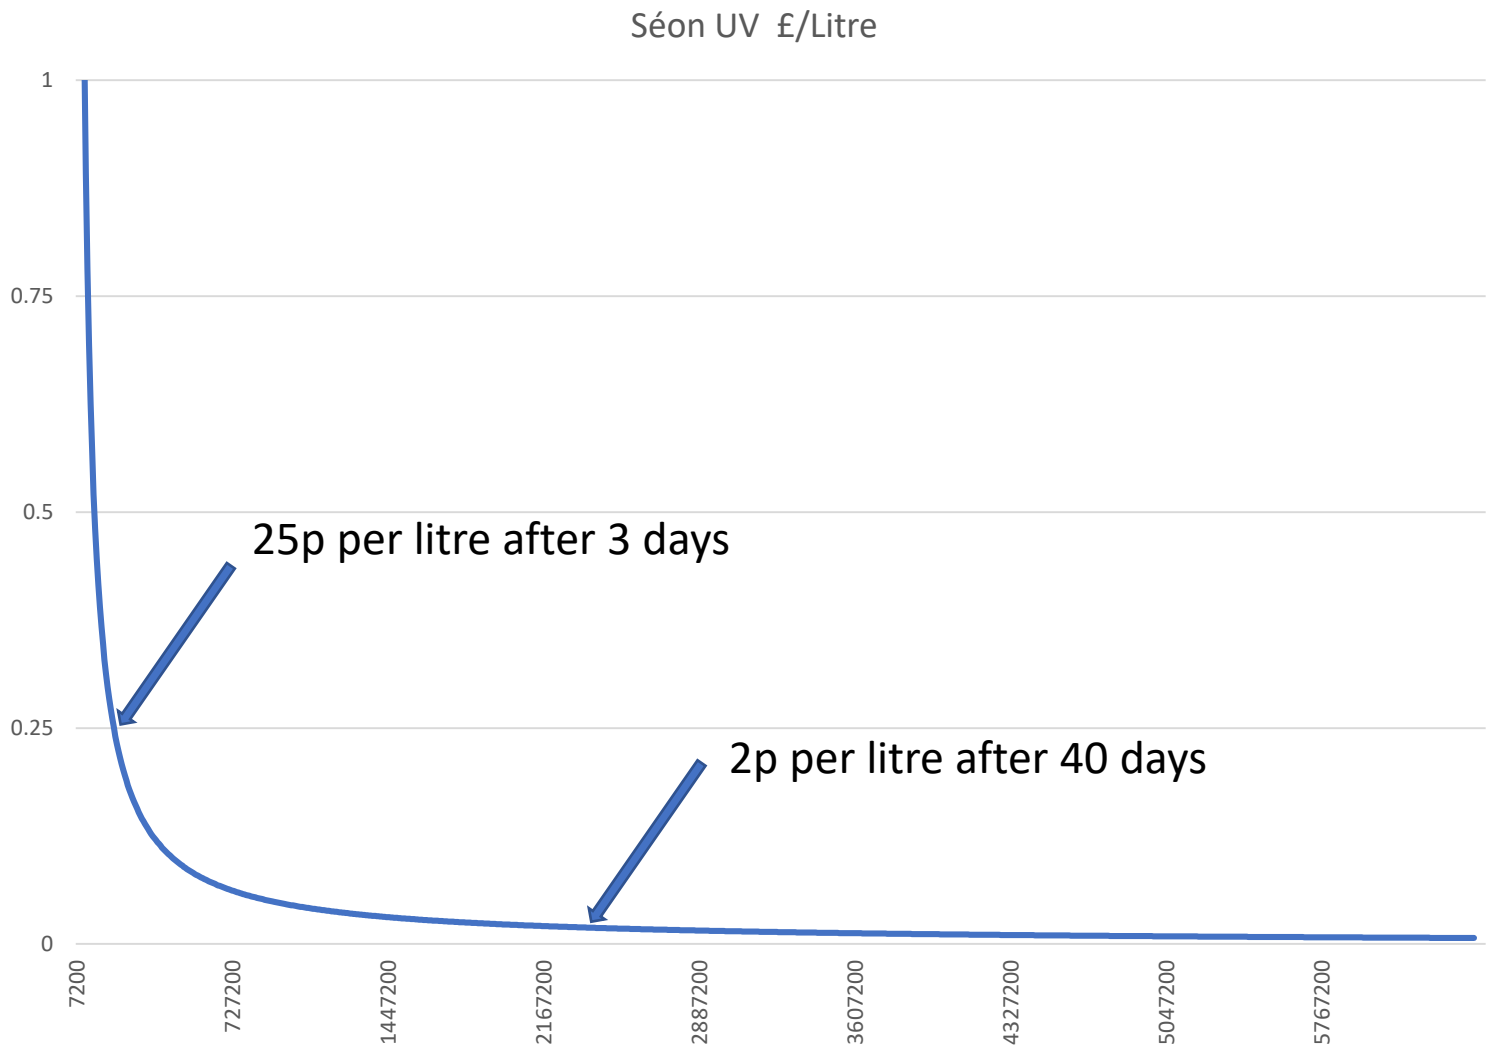

# Cost Effective

- Cost per litre reducing over time
- Low Energy footprint
  - On board generator or Solar power
- Rapid investment return

- What is YOUR current TOTAL cost per litre?
  - Water and logistics

# Water Costs

Once the unit is on site, water transport costs become zero.

High Volume gives rapid decrease in per litre costs.

Assumptions:  
UK list price for unit  
8 hours/day operation  
7200 litres/hour  
Low Turbidity Source
