ANF1

Buffered Mount 7.62 mm

SPECIFICATION

Weight:	17 kgf (excluding weapon, ammunition)
Ready rounds:	400
Elevation Arc:	Typically -10° to +50°
Traverse sweep:	Adjustable traverse stops (to limit arcs of fire). ± 45° Transitory traverse stops
Gunner Protection:	Ballistic front shield & (optional)
Ballistic Protection:	Stanag 4569 Level 1, 2 or 3
Spent cartridge & links:	Chutes and collection bag included

INTERFACE OPTIONS

- Pedestal
- Slewing Ring
- Bulkhead
- Vehicle roof
- Bulwark

ANF1

Buffered Mount 7.62 mm

DESCRIPTION

Designed for harsh naval and land systems environments, these lightweight mounts are manufactured from Stainless Steel and high strength Aluminium Alloy with minimal through-life schedule maintenance.

Buffered weapon cradle for reduced recoil and operation comfort.

Spent cartridge case and link collection in all azimuth or elevation positions, the mount is lockable in any position and includes traverse and elevation trundle locks.

Traverse stops are adjustable and a $\pm 45^\circ$ transitory traverse stop is included.

Two mount options are available;

- 'All-in-one' mount and traverse bearing housing
- G3 Cone Mount – for assembly to a G3 Cone Receiver (supplied separately or together)

The G3 Cone Receiver permits quick change of weapon mounts to satisfy mission requirements. Otherwise, the mounts are identical in every respect.
