The Model 7007 PCI Automatic Video Tracker (AVT) belongs to the latest tracker product family in E-O Imaging's continued commitment to product innovation and improvement and is also available with either a High Definition (HD), Digital Visual Interface (DVI) or Camera Link (CL) digital video capability. This single board tracker provides the user a system easily adapted to a wide range of target and tracking environments through the incorporation of the latest in digital signal processing (DSP) and field programmable gate array (FPGA) technology (providing a flexible architecture for customization). The Model 7007 interfaces with both analog and digital video sources, providing ease in interfacing with a wide variety of sensor systems. The analog video interface provides full 12-bit, 4096 gray level capability supporting an array size up to 1024 x 1024. The HD video interface supports 480i, 480p, 720p, 1080i and 1080p resolutions, SMPTE 259M / 344M / 292M / 424M, while the Camera Link digital video interface supports array sizes up to 2048 x 2048 with 16-bit resolution. The tracker design incorporates a multiple DSP implementation allowing concurrent operation of algorithms in realtime. The system is structured with an open architecture allowing easy incorporation of specialized features and algorithms. The Model 7007's standard features and options permit easy adaptation to even the most complex and demanding test range, tactical, surveillance and industrial applications.
The Model 7008 tracker provides the same performance with a dual target capability.
