

MOBILE DEVICE DATA EXTRACTION SOLUTIONS FOR THE FRONTLINE

EVIDENCE AND INTELLIGENCE IN THE PALM OF YOUR HAND

The number of mobile devices in circulation continues to grow so does the challenge that crime managers face. The Radio Tactics ACESO platforms enable restricted access, evidentially-sound data extraction from mobile phones, GPS devices and media cards. ACESO Kiosk is for use in custody suites and other fixed locations and ACESO Field is for use on the move.

COMPLIANCE AND EVIDENTIAL INTEGRITY

Maximum protection and security

The ACESO unit can only be accessed by trained and authorised officers. The unique locked down data acquisition process, data encryption and patented Handset Access Card technology for network isolation ensure that all ACESO units adhere to the most demanding evidence collection procedures.

BENEFITS

- ▶ ACESO empowers officers to securely, quickly and accurately gather data from mobile phones and other devices.
- ▶ Ability to act on information contained within a device whilst the evidence trail is live.
- ▶ Ability to exploit information recovered from SMS, call registers, photographs and social networking data to identify additional lines of enquiry.
- ▶ Extensive support for GSM, CDMA and GPS devices with updates for all popular new devices.
- ▶ Proven to reduce the cost of mobile phone examination.

- ▶ Unique, secure access with personalised Keycard
- ▶ SIM/Micro-SIM Handset Access Card
- ▶ AES encrypted data storage

IMPROVING OPERATIONAL PERFORMANCE

When deployed to frontline users, ACESO has been proven to successfully support investigations across all categories of crime delivering rapid actionable information.

- ▶ Massive increase in mobile device analysis capacity
- ▶ Typical phone acquisition completed in less than 20 minutes
- ▶ Allows specialist technical experts to focus on the most serious crime cases

RAPID RETURN ON INVESTMENT

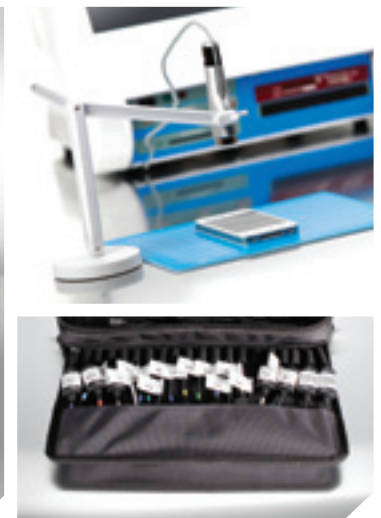

Forces with frontline ACESO deployments have achieved spectacular cost savings, and productivity improvements.

- ▶ Proven reductions in the cost of mobile device examinations
- ▶ Radio Tactics 'Certified Operator' training program to support rapid deployment
- ▶ Audit log and reporting software to support usage monitoring and derive further efficiency improvements over time

ACESO FEATURES

- ▶ Secure Keycard login required to access the unit
- ▶ Easy-to-use, fully guided process aligned to customer operating procedures
- ▶ Intelligence and data capture from Smartphones and social media applications
- ▶ Metadata access to extract critical details, including time and date, geotagging and make and model of device used
- ▶ Simple touch screen user interface with keyboard entry of customer specific text fields
- ▶ Safe network access blocking with Radio Tactics' patented Handset Access Card technology
- ▶ High levels of security and integrity with all data stored in AES encrypted format
- ▶ Integrated Analysis Suite for report pre-viewing and burning to disc for the evidential file
- ▶ Range of data output formats supported including PDF, XLS and encrypted RTL
- ▶ USB output option available
- ▶ Complete set of cables and peripherals
