

LIVE FIRE TRAINER™ (P3000)

*"Realistic simulation training
for live fire ranges."*

Enhance Your Live Fire Range

PRISim Suite® LiveFire Trainer is the most technologically advanced live fire weapons simulator available on the market today. It provides a unique training environment wherein military and law enforcement professionals can combine live fire with video-based or CGI interactive scenarios for unprecedented, realistic training. PRISim Suite LiveFire Trainer is available for installation into certified live fire ranges or our self-contained modular QuickRange®.

PRISim® LaserLiveTrainer PRO

Key Features

- Live fire sensors track rounds up to 3,248 fps and 5.56 to .50 caliber munitions
- Self-healing Linatex screen capable of handling thousands of rounds
- Simulates qualification courses in any live fire range
- Presents consistent training scenarios and learning objectives for each trainee
- Records training performance for after action reviews
- Integrated PowerPoint® viewer
- Scenario performance and debrief export

Product Specifications

- Installed desktop computer
- Two LCD monitors for PRISim Suite® interface and video display
- Keyboard and mouse
- Mounted Screen
- Ceiling-mounted HD projector
- Two high-speed bullet detection sensors
- 90 watt audio amp and mounted speakers
- Pre-installed and tested software
- Cables and accessories

- Optimum training for shorts at certified Live Fire Ranges
- Variety of screens available, based on your requirements
- Simulate any situation where a decision must be made in real time, with immediate feedback
- Customised video content can be produced in your facility or location
- Audio and video capture of trainee responses provides immediate feedback for memorable
- Easy-to-use graphical software user interface

LIVE FIRE TRAINER™ (P3000)

- ✓ Dedicated, installed system
- ✓ 400+ branching scenarios
- ✓ 24/7 technical support
- ✓ One year system warranty

Live Fire Qualification

Capture (Picture-In-Picture)

System Options and Accessories

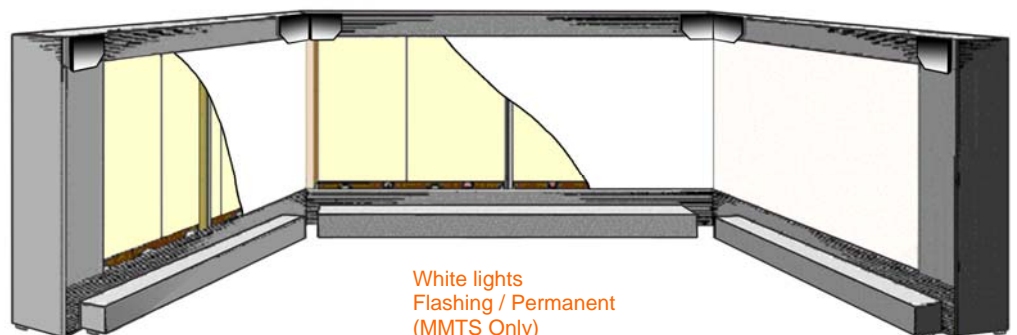

- Capture feature records video of participant reactions
- Extensive library of professionally produced branching scenarios
- Authoring software allows users to produce and edit custom scenarios
- Professional multimedia services available for customized scenario development
- Touch screen monitor interface
- Wireless tablet interface
- Printer for debrief reports and record keeping
- Extended system warranty plans
- Operator training
- Marksmanship and Judgment Trainers

LIVE FIRE TARGET SCREENS

Our screen units are designed for indoor use with our live-fire training systems. They may also be used with laser-based systems and training ammunition. Screen units are available in 3 standard sizes—2400, 3500 and 4500—we also manufacture screens to custom sizes, depending on your requirements. We produce a reinforced high-brightness paper. Each screen unit is supplied with two rolls of paper. Each roll is 50 metres in length.

In addition to our 'flat' screens, we also manufacture a range of panoramic and 180° screens. The two flanking screen sections can be positioned to provide a wrap-around view for 180° training systems, or they can be folded flat to give a larger panoramic screen for shooting at static targets with multiple firers shooting in their own lanes.
