

3M™ PELTOR™ CH-5 High Attenuation Headset

3M™ PELTOR™ CH-5 High Attenuation Headset Communication headset for extreme environments

You have two great reasons to protect your hearing – your only two ears. The CH-5 Headset employs the latest technology to help provide protection against hazardous levels of noise including impact sounds. One application for this is in and around battle tanks during live firing conditions. For this kind of application the headset is designed to cope with both the rough and extreme environments.

Hearing protection for
communicating with external
communication devices.

Hearing protection and communication

The 3M™ PELTOR™ CH-5 High Attenuation Headsets offers an SNR value of 37dB and helps provide good impact sound protection. Designed to be used in extreme military environments, the CH-5 headsets help provide protection when exposed to the loud sounds of tanks, fighter jets, and helicopters. The CH-5 High Attenuation Headsets offers a newly developed watertight boom microphone with improved noise cancellation as well as compatibility with existing 3M™ PELTOR™ Adapters. Smart construction enables easy and fast maintenance even out in the field.
