

MARKSMANSHIP TRAINER

KEY FEATURES

- Live fire or laser-based 3D realistic training (outdoor and indoor ranges)
- Multiple lanes of fire
- Centralized control over multiple screens
- Extensive courses and target library
- Adjustable wind conditions
- Course editor for creating custom tailored courses
- Supports broad range of standard issue firearms and devices
- Review and export of training performance
- Ability to use scorecards

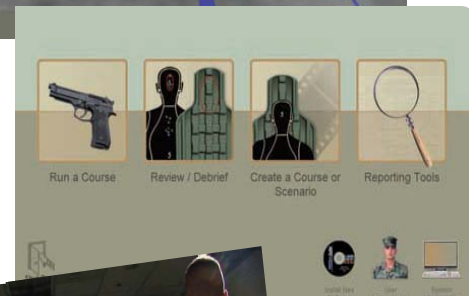

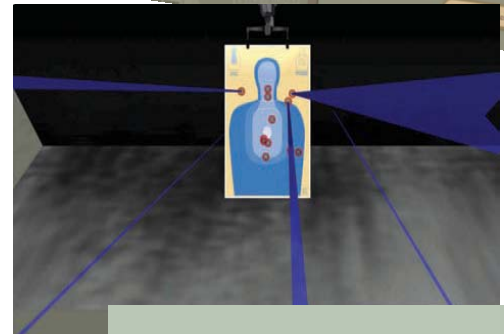

The Marksmanship Trainer is a basic to advanced marksmanship and weapons qualification training program available for installation on your PRISim Suite® system. Pre-built 3D environments and custom courses, in both indoor and outdoor ranges, create a realistic training experience.

Independently scored lanes across multiple screens allow for simultaneous marksmanship training.

It also simulates wind conditions that would affect the flight trajectory of projectiles.

Marksmanship Trainer reduces the need for a conventional shooting range. Pre-qualifications and practice can be done in simulation, bringing trainees up to speed prior to final qualification.

Saving range time and money, while reducing safety hazards.

The Primer Pack is the core content pack included with every PRISim Suite® Marksmanship Trainer.

Outdoor courses demonstrate many features of the Marksmanship Trainer, such as multiple lanes of fire, target scoring, timed stages, and shoot/no shoot targets. External ballistics for commonly used ammunition are also available for trainees.

Create your own training scenarios from a wide selection of targets, range backdrops, and distances. Set the criteria by limiting the number of rounds fired and time of each stage, selecting targets, and showing or hiding shots during training.

KEY FEATURES

- Ranges with varying distances
- Numerous Law enforcement, military, and miscellaneous targets available
- Target scoring
- Multiple lanes of fire
- Show or hide shots during training
- Different shooting perspectives (standing, kneeling, or prone)
- 15 preloaded ballistic settings for commonly used ammunition
