

High Density Space Level Diode Array Data Line Transient Suppressor, SCP-6291

Features:

- Smallest package in the industry
- High density
- 400V, 1A
- Devices are serialized
- Built and screened to space level quality
- Space quality level conformance testing is performed on each lot
- Two diodes in series per leg for redundancy

DIODE ARRAY

Description:

Sensitron, a price performance leader in power management, introduces a new series of COTS data line transient suppressors. The SCP-6291 space level diode array series has the *smallest footprint* in the industry, with very high density.
