

# Remington Weapons

## R11 RSASS™

The Remington Semi Automatic Sniper System is the culmination of a joint effort between Remington Arms and JP Enterprises to develop a highly accurate and superbly built rapid firing sniper rifle. This weapon delivers sub-MOA accuracy out to 800 meters and beyond while providing the tactical advantage of a semi-automatic platform. This weapon succeeds where others fail, meeting any and all mission requirements with ease.

## R5 RGP™

Available as a stand-alone carbine or as a complete upper ready to install on your M4 style lower, the Remington R5 RGP (Remington Gas Piston) represents the next great leap in the evolution of the modern combat rifle. Featuring a monolithic upper with free-floating handguard, robust mid-length gas piston operation and toolless disassembly for cleaning, the RGP is designed from the ground up to provide rugged, accurate service in even the most extreme conditions.

## ACR™

One Rifle. Many Missions.

The revolutionary, fully-modular Remington Adaptive Combat Rifle (ACR). The ACR was initially conceived to provide today's warfighter an American-made, reliable, accurate, and mission – configurable rifle. Three American companies – MagPul Industries Corp., Bushmaster and Remington – shared this common vision and after multiple iterations of torturous testing only the strongest materials, components and concepts survived.

The ACR can change calibers from 5.56mm to 6.8mm in minutes at the user level by changing the bolt head, barrel, and magazine. The ACR can also change barrels, stocks, and accessories to go from a close-quarters battle carbine to a designated marksman rifle. Add a superbly reliable gas piston operating system, controllable full-auto fire capability, a non-reciprocating bolt handle, a monolithic free-floating handguard rail system, and intuitive, ambidextrous controls and you have a platform that is a natural fit for any operator and gives him all the options he needs. Made in the USA for government sales by the oldest name in firearms and ammunition – Remington delivers again.

## R12™

The Remington R12 Autoloading Tactical Shotgun ushers in a new era in combat shotguns, from America's oldest gun maker. The R12's self adjusting, short-stroke, dual piston gas operating system provides unmatched versatility and maximum reliability with minimal maintenance. The ability to fire all standard 12-ga. 2 3/4", 3" and 3 1/2" loads ensures that the R12 is always ready for any job - from ballistic breaching to security to wildlife management. Best of all, the unique operating system and revolutionary SuperCell recoil pad combine to produce a 12-ga. shotgun that fires magnum loads with almost 20% less felt recoil.
