Subject: Westwire Harnessing Ltd, Headlands Trading Estate, Headlands Grove, Swindon, Wiltshire, SN2 7JQ

Over the last five years, Ultra PALS has partnered with Westwire Harnessing for various programs including our BMS (Battery Monitoring System) and A400M Landing Gear Harness programs. This co-operation, in each case, has included design for manufacture, to prototyping and through into full production. Also, Westwire has provided design support and manufacture on test equipment cables for Ultra PALS supplied equipment destined for both the Scout and Warrior programs.

Very recently, on our NIMR program, Westwire embraced the need for our chosen partners to support Ultra PALS with Engineering and Logistic Procurement in advance of any Purchase Orders being placed.

Westwire has a pro-active and enthusiastic disposition as well as a very high level of delivered quality and delivery performance which is a credit to its employees.

Yours faithfully

Ian Bradley
Head of Management Systems & Purchasing
