Dear Dominic,

Westwire Harnessing has been very supportive of Excalibur Systems on a number of projects. In each case, specifications have been supplied and these have been turned around quickly and incorporated into designs that are geared towards manufacture.

Most importantly, by demonstrating an impressive knowledge of the market place to ensure the correct choice of product, the subsequent designs have always been delivered quickly, to a high quality standard and have always been able to be incorporated into our equipment quickly and effectively.

Yours sincerely,

Steve Baker

Managing Director
