

BATTLEFRONT BRIEFING

WESTERN GLOBAL DEFENSE CUSTOMER UPDATE

Welcome to the first Western Global Battlefront Briefing of 2025! As we embark on this new year, we reaffirm our unwavering commitment to innovation and excellence in tactical fuel storage solutions. The challenges of today demand agility, resilience, and cutting-edge technology, and Western Global is proud to stand at the forefront, supporting the warfighter and mission success across the globe.

FRTT: FUELS RECIRCULATION TEST TANK

The Fuels Recirculation Test Tank (FRTT), designed and manufactured by Western Global, is a modular testing system supporting USAFE and HQ ACC/AMIC operations. It evaluates War Reserve Material (WRM) Fuels Mobility Support Equipment (FMSE) and Fuels Operational Readiness Capability Equipment (FORCE) at flow rates up to **900 GPM**.

The system underwent rigorous evaluation through controlled simulations, where JP8 fuel was circulated using the R18 fuel pump, R19 Filter Trailer, and R20 Servicing Platform. This process validated operational efficiency, ensuring consistency and safety throughout. Standardized operational procedures were developed to optimize fuel reclamation during setup and breakdown, which limited environmental risks, and enhanced system familiarity for operators.

The FRTT demonstrated its transformative capabilities as a mobile and flexible testing platform, enabling effective equipment evaluation and hands-on training for Airmen. By streamlining operational protocols and facilitating forward deployments, repairs, and training exercises, the FRTT has become an indispensable tool for readiness and operational resilience.

ANSWERING THE CALL FOR MINISTRY OF DEFENSE BULK FUEL STORAGE RENTAL SOLUTIONS

Western Global has provided rapid, reliable rental solutions to meet the Ministry of Defense's (MOD) bulk fuel storage needs at Middle Wallop, RAF Wittering, and RAF Fairford.

Middle Wallop - At the Army Aviation Centre in Middle Wallop, we established a 60,000-liter (roughly 16,000 gallons) aviation fuel site in partnership with UK Strategic Command's Fuel Transformation Program (FTP) and British Army HQ. Operating since June 2024 under a single Royal Logistics Corps Petroleum Operator, this containerized solution has delivered 60,000 liters weekly and has now been extended until March 2025.

RAF Wittering - Simultaneously, our containerized system at RAF Wittering supports an alternative diesel fuel (HVO) trial. This trial was conducted by Support Force RAF Wittering. By seamlessly integrating with existing logistics, it has dispensed 20,000 liters (slightly more than 5,000 gallons) of HVO, with final results to be included in the upcoming Fuel Transformation Program Report.

USAF Operations at RAF Fairford - Western Global also deployed a single tank system suitable for aviation fuel. Despite stringent requirements, the system continues to operate flawlessly, underscoring our capacity to meet specialized fuel storage demands.

Looking Ahead These missions highlight our ability to rapidly deliver effective fuel storage solutions, ensuring readiness across varied operational environments. These systems were provided from our Polish-based rental fleet, which offers rapid deployment with no minimum time commitment. As Western Global advances, we remain committed to supporting DoD partners with temporary storage solutions for future temporary storage needs. Our goal is to provide a turnkey solution across all DoD construction sites.

COMING SOON...

Maintenance and Sustainment Contract: The Baltics Western Global is excited to have been awarded a new Maintenance and Sustainment Contract supporting the US Army V Corps. This initiative will enhance operational readiness by ensuring the maintenance and sustainment of WX-Autonomous systems that have already been purchased and are currently in use at multiple deployed locations across the Baltic Front. More details will follow as the project unfolds.

Guam and the Philippines: Western Global is preparing operations in Guam and the Philippines, enhancing regional fuel storage and distribution capabilities. Stay tuned for updates in the next edition!

UPCOMING EVENTS: MEET US THERE!

WE ARE EXCITED TO ANNOUNCE THAT WESTERN GLOBAL WILL BE PRESENT AT THE FOLLOWING EVENTS:

Ramstein AB Tech Expo
Officer's Club
February 25, 2025 – Ramstein AB, Germany

POST Conference
Hawaii Convention Center
March 3-7, 2025 – Honolulu, Hawaii

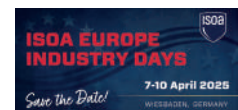

NPMC PETRO 2025
MGM National Harbor
March 24-27, 2025 – Oxon Hill, Maryland

Combat Engineering and Logistics
Warsaw EXPO XXI
March 25-27, 2025 – Warsaw, Poland

ISOA Europe Industry Days
Rhein Main Congress Center (RMCC)
April 7-10, 2025 – Wiesbaden, Germany

AUSA LANPAC
Sheraton Waikiki
May 13-15, 2025 – Honolulu, Hawaii

ISOA Indo-Pacific Conference
Honolulu, Hawaii
May 15-16, 2025 – Honolulu, Hawaii

Western Global has a dedicated, specialist defense team operating across Europe and the US. They are primarily Veterans with a detailed knowledge and understanding of operational needs and procurement processes. They speak the language of government and military and are fully qualified to help with your military fuel needs.

WE'RE READY TO SUPPORT YOU

BRING US YOUR FUEL REQUIREMENT

Please fill out the attached form and send it to defense@western-global.com. One of our regional specialists will then provide you with a tailored solution to meet your requirement

Fuel Type: (JP8, Diesel, Gasoline, Jet A1)	
Application: (Extended Generator Run Time, Ground Vehicle Refueling, Bulk Storage, Aviation Refueling)	
Capacity:	
Stationary or Mobile:	

Thank you for being a valued part of the Western Global community!
