

Technical Publications

Allan Webb Ltd (AWL) has a team of over 20 technical authors offering a comprehensive range of services from the creation and supply of individual elements of documentation, to the management and delivery of entire support packages.

60 Years of Experience

With experience ranging from Maritime, Defence and Aerospace, to Power Generation and Manufacturing, our team is ready to support you regardless of your industry background.

Our authors are well versed in operation and maintenance task analysis and breakdown of complex systems using various engineering methodologies to produce safe and fit-for-purpose technical documentation.

Over the years, we have worked with a range of documentation including, but not limited to:

- User Manuals
- Aide Memoirs
- Operator Manuals
- Maintenance Manuals
- Training Manuals
- Quick Start Guides
- Interactive Electronic Technical Documentation.

These have all been produced in accordance with International and Industry Specific Standards when required.

Agile in our Solution

Depending on the requirement and level of information held by the client, AWL will adapt the methodology to ensure the process takes into account the client's own processes and procedures, and the requirements of the end user.

AWL will also adapt methodology where required in accordance with applicable standards if specified or flowed down by the client.

We can develop documentation in a range of formats from simple PDF books to Interactive Electronic Technical Publications (IETPs).

Dedicated to understanding your requirements

We ensure that our expert authoring team have all the required information and understanding of your equipment and systems to produce a comprehensive publication.

A suitable Tech Author can spend time onsite, liaising with engineers, capturing processes and procedures, which can then be authored by our team at our offices in Stonehouse or Barrow-in-Furness.

Alternatively, if required, our experts can obtain information from Original Equipment Manufacturers (OEM) and other sources of information to develop technical publications remotely.

Right First Time, On Time

We have comprehensive, ISO 9001 certified, Quality Assurance procedures in place right across the technical authoring process including:

- receipting the initial arrival of the task
- scoping the Statement of Work.
- Production processes.
- Post production checks.
- Client reviews of 1st draft.
- Producing the Final copy in accordance with client feedback
- Delivery of Technical Publication.

Our extensive experience allows us to deliver a high quality (right first time), efficient service, producing technical documentation for a variety of target audiences including operating information, maintenance information and training information.

We strive to develop a solution that best meets the needs of the end user and our team has the experience and knowledge to advise on this if necessary.

Have a Requirement?

Our dedicated team of experts are on hand to discuss any of your requirements and advise on a bespoke solution most suited to you.

You can call us Monday – Friday on +44 (0) 1453 824581 or email: Sales@allanwebb.co.uk.
