## AVON TRAINING & CONSULTANCY

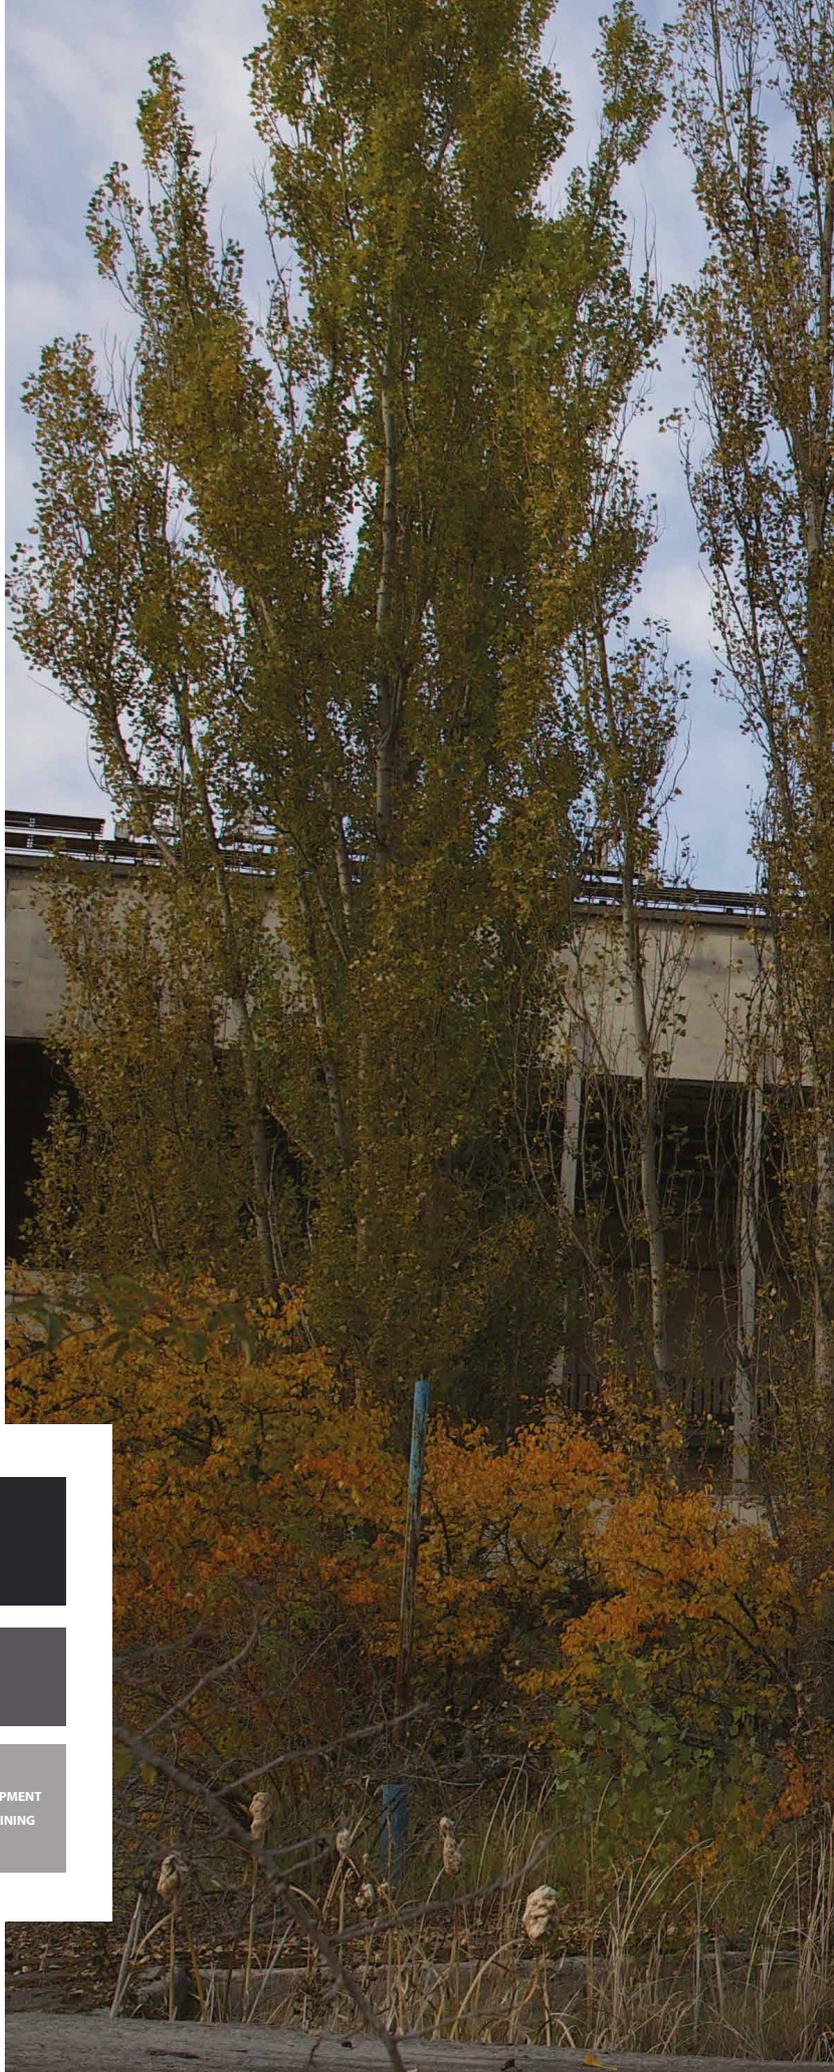

### AVON PROTECTION – THE WORLDWIDE LEADER

With a reputation for continuously investing in product development and our 100 year heritage, Avon Protection is the known and trusted brand in CBRN respiratory protection products for air, land and sea operations.

In response to the evolving worldwide threat environment, we have expanded our services to deliver customized threat focused, end-to-end (CBRN) security solutions.

Underpinned by expert analysis and operational experience, our consultancy and training services deliver tailored threat analysis, pre-incident planning and incident response support, right through to the restoration of business as usual.

Protecting people, assets and reputation is at the heart of our offering, minimizing the crisis period with its associated risk, uncertainty and expense.

## COMPLETE GLOBAL CBRN PROTECTION SOLUTIONS

The last decade has clearly demonstrated that the nature of threats to international security has changed significantly. Structural challenges, such as terrorism, cyber-attacks and nuclear proliferation have created an entirely new security environment and threatscape.

Chemical, Biological, Radiological and Nuclear (CBRN) terrorism poses a clear threat to public health and safety, national security and economic and political stability on a global scale. As a result the prevention of such incidents is of the highest priority.

Avon Protection's Training and Consultancy services proactively manage and mitigate CBRN risks through our 'Plan - Prepare - Respond - Recover' framework, to ensure CBRN hazards have less of an impact on your business and your people.

Our clients receive tailored pre-incident preparation and threat analysis, to support effective and efficient transition from incident response to business continuity, and the restoration of business as usual.

## RISK MANAGEMENT SERVICES

*Pre-incident planning prior to a major event.*

### PRE-INCIDENT ADVICE

Delivering pre-event consultancy and advice, Avon Protection's consultants lead you through threat evaluation, the identification of potential attack pathways, routes of entry, and the likely impact of an event, together with the consequences and possible outcomes.

The pre-incident analysis, allows organisations to see their vulnerabilities and delivers commercially appropriate risk reduction strategies, to minimise the probability of a CBRN event and lessen business interruption.

### IDENTIFICATION OF RISKS AND THREATS

Through our research and analysis team, Avon Protection continually monitors and tracks CBRN events worldwide. The bi-monthly CBRN threat bulletin, INSIGHT, provides up-to-date news and analysis to keep clients informed of the latest developments, trends and threats.

Bespoke threat reports are also offered for CBRN risks and trends, specific to your organisation.

### ASSESSMENTS

Avon Protection Training and Consultancy works with clients to develop specialist CBRN Risk Assessments and guides them through the execution of a CBRN Risk Register. Supported by personalised national, regional and local travel and threat assessments, these reviews are at the heart of understanding and implementing an effective risk strategy.

## PLANNING AND IMPLEMENTATION OF RISK MANAGEMENT STRATEGY

### INCIDENT RESPONSE PLANNING

Avon Protection Training and Consultancy deliver a broad range of risk mitigation and planning products, from delivery of staff training and the development of standard operating procedures, through to attaining CBRN detection, identification, protection and decontamination systems. Using these key tools, the impact of a CBRN event can be alleviated or at least reduced, saving lives, reassuring staff and protecting routine commercial activity.

### EQUIPMENT SOLUTIONS

Avon Protection's depth of experience in the CBRN field, enables our consultants to understand specific requirements and deliver the right equipment solutions to meet the needs of the client. A range of ownership options including direct purchase, short term rental, and long term leasing is available for our equipment solutions.

## STRATEGIC AIMS & GOALS

Avon Protection Training and Consultancy provides analysis of national security strategies, identifies current and emerging threats, and develops the understanding of current or desired capability to identify and establish nationally strategic aims and goals.

### DELIVERING CAPABILITY

The early analysis and development of CBRN policy, ensures Avon Protection Training and Consultancy are in the best position to manage, deliver and sustain full spectrum CBRN programmes and projects using the proven CADMID Cycle:

### EQUIPMENT SOLUTIONS

Avon Protection is a world leading provider of respiratory protection systems for military, law enforcement, firefighting, and industrial sectors. The company designs and manufactures a broad portfolio of high-performance respiratory personal protection equipment, as well as compatible accessories that employ the most advanced features.

### ESTABLISHING BEST PRACTICE

Prior to recommending any CBRN capability our consultants are able to draw on extensive CBRN operational experience and apply the strategy and doctrine to ensure that best practice is adopted and imbedded into the CBRN capability. The establishment of best practice is cascaded across the organisation through:

A camera man at Chernobyl post Avon training.

## MILITARY, LAW ENFORCEMENT AND PROCUREMENT SERVICES

### TRAINING SERVICES

Avon Protection Training and Consultancy deliver a variety of bespoke courses to meet the unique demands of CBRN training. The courses draw on a wealth of expertise and knowledge developed on CBRN operations in the most challenging of environments. Each course can be tailored to meet the needs of the client - from basic awareness for smaller organisations through to the development of specialist military or policing CBRN units.

For the vast majority of our courses, we offer 3 flexible training options:

- **training is available at our dedicated facility in the UK**
- **we can host you at any of our Avon Protection locations worldwide**
- **our training teams can come to you**

On successful completion of the course, students will be issued with an Avon Protection Training Certificate of Competency which is valid for 2 years. All of the courses have been developed in line with the UK's Systems Approach to Training (SAT), and are regularly validated.

*Training military CBRN specialists.*

### EQUIPMENT COURSES

We provide training courses on the full series of Avon's respiratory protection products, as well as on a range of identification, analysis, monitoring and protection equipment solutions, as required by clients. Our equipment courses are offered at three levels, user training, maintenance training and train the trainer:

AIR PURIFYING RESPIRATORS	POSITIVE PRESSURE SYSTEMS	ESCAPE DEVICES	OTHER EQUIPMENT
FM12	MPPAPR	EEBA	Detection
C50	CSPAPR	NH15	Identification
PC50	ST53	CRS15	Monitoring
FM50	ST53SD		Analysis
FM51	ST54		Decontamination
FM53	STPAPR		
FM54	EZAIR		
	C420		
	Deltair		
	Viking		

### OPERATIONAL COURSES

In addition to delivering equipment training, our trainers are experienced CBRN operators and deliver a full spectrum of CBRN courses to meet your needs. Our courses have been individually developed to deliver end-to-end CBRN capability, ensuring that those new to the subject receive a manageable introduction and the more experienced operators and commanders are aptly challenged.
