

CANiK® M2 incorporates many improvements over this venerable 12.7mm (.50 cal.) heavy machine gun which has been widely used on armored and light vehicles, shipborne mounts as well as by infantry on a tripod mount in anti-material, anti-vehicle and anti-personal roles. CANiK® Proudly presents that world most durable and lowest dispersion M2 QCB 12.7mm (.50cal) heavy machine gun with +25.000 rounds barrel life and less than 6 MOA dispersion. The combination of moisture, oxygen and salt, especially sodium chloride, damages metal worse than rust does. Thanks to QCB's unique MARINE GRADE ANTI-CORROSION COATING(MGAC) technology, CANiK M2 QCB provides the best protection against the corrosive effects of salt water, especially against splash, having the highest corrosion effect.
