

THE ORIGINAL SINCE 1919

elbe ORIGINAL®
GELENKE **elso**®

System partner for power transmission

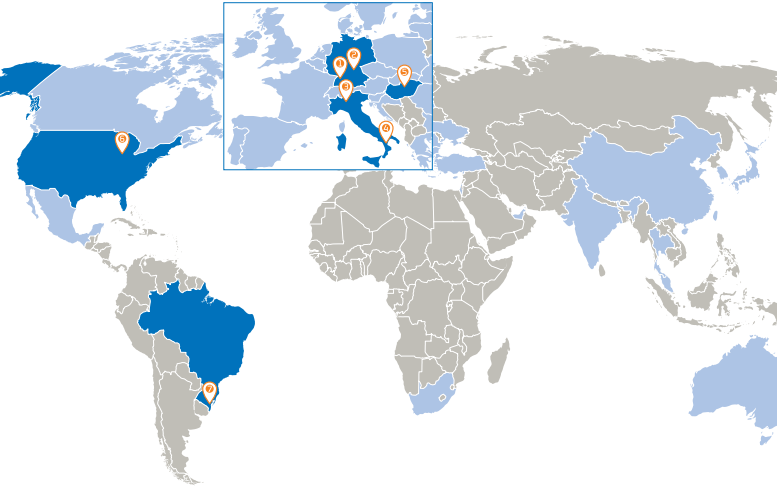

The Elbe Group, founded in 1919, is the market-leading company in the production of drive solutions for vehicles and mechanical engineering.

As a global player with more than 1.100 employees we have production sites in Germany, Italy, Hungary, Brazil and USA.

The Original since 1919

Your individual drive solution by Elbe, irrespective of whether it is about a prototype, an individual design, a small batch or a large-scale production.

Customizing

We offer a range of individualization options like no other market participant.

Technical Design

Based on your performance parameters and the environmental conditions, we can develop a variety of individual solutions from our extensive product range.

Life Expectancy Calculation

With your performance parameters we can calculate a theoretic life expectancy (B10) of cardan and precision drive shafts.

Development and Testing (R&D)

Our Department for Development and Testing can simulate applications on our different test benches.

MRO / Service

For our understanding service exceeds the area of repairing by far.

Product variety is our strength

Cardan Drive Shafts | Double joints | Centered Drive Shafts
Precision Cardan Shafts | Cross Cardan Shafts | Ball and Socket Shafts | Drive Shafts Wing-Style | EST Sensory Drive Shaft | Drive and Driven Flanges

Our Values

- Already our founder Gottlob Elbe defined the values which are still valid today at Elbe: customer focus, technical excellence and the willingness to grow with our customers' requirements. For us these values are a guarantor for long-term and successful partnerships.
- Worldwide the brand ELBE stands as much for tradition as it does for innovation.
- We act consciously and responsibly. To protect the environment and to use our energy resources as effectively as possible – we take both for granted.
- Security with regard to data protection and IT is important to us. Therefore, this section of our daily work has been certified, too.
- To act worldwide and deliver without any loss of time – this can be realized by our status as Authorized Economic Operator (AEO) for customs simplifications.
- Our certifications document our standards and performance.
 - IATF 16949:2016 – Quality management system
 - ISO 50001:2018 – Energy management system
 - ISO 14001:2015 – Environmental management system
 - ISO/IEC 27001:2013 – Information security management system
 - AEO (Export) – Authorized Economic Operator

Whenever reliability and a long-life cycle is required, Elbe drive shafts and components ensure that machines and vehicles in daily use are able to stand the test of time.
