

### Intro

The MEER (Maritime Emergency Egress Rescue) is our lightest and most compact category A CA-EBS. Offering the next generation of rotorcraft egress technology. Engineered and designed to operate in the toughest environments. Optimised for ease of use by helicopter passengers and crew members.

### Key Features and Benefits

- 232 BAR & 300 BAR working pressures (cylinder dependant)
- Available with light weight composite or aluminium cylinders
- Compact and light weight first stage
- Ease of service
- Flexi light weight hose. Standard length 635mm (25")
- Left and right hand neutral second stage
- Light weight, low bulk
- Low inherent breathing resistance
- Pressure dial Indicator with protective boot
- Provides user with at least 1 minute of air
- Valve "opened / closed" visual indicator
- Spares kits, tool and test kits available
- Standard bite mouthpiece
- Nose clip system available
- Intended for use as a Helicopter escape device
- Yellow 2nd stage option available
- Innovative, low profile 2nd stage design, minimises drag
- 2nd stage pneumatically balanced valve provides superior performance

### Specifications

- Weight: 0.83kg – 0.93kg
- Overall Dimensions: from 214mm to 297mm (depending on cylinder choice)

Product Code	Description
AP01007	MEER EG 0.25L C 25 YEL (0.25L Cylinder Composite, Yellow Hose)
AP01008	MEER EG 0.25L A 25 YEL (0.25L Cylinder Aluminium, Yellow Hose)
AP01009	MEER EG 0.25L C 25 BLK (0.25L Cylinder Composite, Black Hose)
AP010010	MEER EG 0.25L A 25 BLK (0.25 Cylinder Aluminium, Black Hose)
