

EX-MASTS

TACTICAL WINCH AND BELT-OPERATED TELESCOPIC MASTS – UP TO 20 METERS

**MAST
SYSTEM**

EX-MASTS

Lightweight telescopic EX-masts are mechanical winch and belt-operated masts made of carbon and glass fibre composite material.

EX-masts are telescopic masts for heights up to 20 meters and 50 kg top loads, depending on mast performance requirements. EX-masts can be deployed by one to three persons and are elevated with a hand cranked winch or by an optional electric Winch Power Unit (WPU).

The entire mast is rotatable by 360 degrees. EX-masts can be equipped with various antenna adapters and antenna positioning accessories. EX-masts can be supplemented with a wide selection of mounting kits for vehicles and shelters. Sand plate kit or hard ground kit are also available. Standard designs can be customised according to customer's specifications and requirements and painted in customer specific colours.

ACCESSORIES AND ANCILLARIES

- antenna positioners (rotators, filters & rotator-tilters)
- antenna adapters
- accessory bags
- winch, winch power unit (WPU)
- vehicle mounting kits
- sledgehammer, guy stakes
- ground spike, spike, eye bar, base plate
- guy reels and measuring rope
