

EXL-MASTS

TACTICAL TELESCOPIC MASTS FOR LARGE AND HEAVY TOP LOADS – UP TO 50 METERS

**MAST
SYSTEM**

EXL-MASTS

Telescopic EXL-masts are mechanical winch and belt-operated masts, designed for larger and heavier top loads. EXL-masts are made of carbon and glass fibre composite material.

EXL-masts can be deployed by two or three persons and are elevated with a hand-cranked winch or by an optional electric winch power unit (WPU). The entire mast is rotatable by 360 degrees. EXL-Masts are lightweight, telescopic masts for large and heavy top loads. Automatic mechanical locking mechanism allows guying each lower section separately during winching up. This allows safe handling of higher top loads especially under windy conditions.

Standard designs can be customised according to customer's specifications and requirements and painted in customer specific colours. EXL-masts can be supplemented with a wide selection of mounting kits for vehicles and shelters. Sand plate kits and hard ground kits are also available. In addition, EXL-masts can be equipped with various antenna adapters and antenna positioning accessories.

ACCESSORIES AND ANCILLARIES

- antenna positioners (rotators, filters & rotator-tilters)
- antenna adapters
- vehicle mounting kits
- winch, winch power units (WPU)
- sledgehammer, guy stakes
- ground spike, spike, eye bar, base plate
- guy reels and measuring rope
- accessory bags

MAST TYPE	EXL167-MASTS			EXL195-MASTS			
	21	24	26	30	34	40	50
